PROJECTS

- AXIOM – Cognitive Stress-Test Engine** *AI-native multi-agent framework designed to systematically expose structural vulnerabilities*
🔗 [GitHub Repo](#) 🔗 [Live Site](#) May 2026 – Jul 2026
- Built async processing pipelines using **FastAPI** and **LangChain** for parallel agent debates via **asyncio.gather**.
 - Leveraged **Groq LPU (LLaMA 3.1)** to sustain real-time adversarial streaming at speeds exceeding **500+ tokens/sec**.
 - Integrated **ChromaDB** vector database for semantic search over historical data to guarantee zero hallucination.
 - Rendered risk metrics into an interactive **D3.js network graph** for real time structural risk visualization.
- DocuMind – RAG-Powered PDF Chatbot** *Retrieval-augmented chatbot enabling conversational Q&A over uploaded PDF documents*
🔗 [GitHub Repo](#) 🔗 [Live Site](#) Jan 2026 – Feb 2026
- Engineered a **RAG pipeline** extracting, chunking, and embedding PDF text into **ChromaDB** vector storage.
 - Integrated **openai/gpt-oss-120b** for context-grounded question answering over uploaded PDF documents.
 - Implemented semantic similarity search retrieving top-k chunks to minimize hallucination and boost accuracy.
 - Built an interactive **Streamlit** interface with chat history, source citations, and live processing.
- CareerCopilot-AI – AI-Driven Career Guidance Platform** *AI-powered platform for resume analysis and mock interview prep*
🔗 [GitHub Repo](#) 🔗 [Live Site](#) Mar 2026 – Apr 2026
- Architected a **MERN** platform delivering personalized machine learning career roadmaps for placement preparation.
 - Integrated **Groq API key** to power real-time interactive technical mock interviews for users.
 - Built a multi-metric **ATS resume optimization** engine analyzing resumes against job-specific criteria.
 - Designed a pure-black cyber dashboard **UI** with **JWT** authentication and **MongoDB** schema persistence.
